GPAWizard

Overview

GPAWizard is a website that is created for *FBLA's Introduction to Programming* event. Currently, this website placed 2nd place at Washington West-Central regionals and is competing at the state competition. The website is coded with Python which is utilized for all of the backend and HTML, CSS, and Javascript for frontend functionality.

Tutorial

This website has an AI Assistant that is loaded with this exact file! It should be able to provide any support about navigating this website or just improving grades in general. Upon entering this website, these are the steps you should take in order to successfully use our dashboard and GPA features:

1. Create an account by heading to the *Login/Signup* tab on the navigation bar.
2. Add your first class by completing the form that is present on the dashboard
3. Once submitting the form, the full dashboard will be available to you. You will be able to view your weighted and unweighted GPA.
4. If you would like to view a printable report of your GPA, you can click the *Download PDF* and you will get a downloaded report!
